

Brightpath - FAQ

What are the member roles and permissions?

Brightpath uses four roles. Owners manage billing, members, and workspace settings. Admins manage members and boards but not billing. Members create and edit tasks and docs. Viewers can read boards and docs but cannot make changes. Assign a role when you invite someone, or change it later from Settings -> Members.

Can we use single sign-on (SSO)?

SSO with SAML and SCIM user provisioning is available on Enterprise plans. Once enabled, members join through your identity provider instead of email invites, and access is revoked automatically when they leave.

Where is our data stored?

Each workspace's data is isolated from every other workspace. Backups are taken daily and retained per your plan. Enterprise customers can request region pinning and a data-processing addendum.

Can we export our data?

Yes. From Settings -> Data you can export boards, docs, and members to standard formats at any time, on every plan. There is no lock-in.

What are the usage limits?

Free workspaces support up to 3 members and 2 boards. Paid plans remove those caps. File attachments are limited to 25 MB per file on Team and 100 MB on Business and Enterprise.

How do we get support?

Free and Team plans include community and email support. Business adds priority email support, and Enterprise includes a dedicated success manager with a response-time SLA.
